

WOOFER

C A R E A I

Intelligent Pet Analysis & Welfare Platform

AI-powered breed identification & personalized care — built for Azerbaijan's growing community of responsible pet owners.

Computer Vision

RAG

Adoption-First

Ethical AI

THE PROBLEM

Pet owners in Azerbaijan are underserved by technology

Information Gap

New pet owners — especially adopters — lack breed-specific knowledge to provide proper care. No localized AI tools exist in Azerbaijan.

Preventable Health Risks

Misunderstanding dietary, exercise & grooming needs leads to avoidable health issues that could be prevented with the right guidance.

High Abandonment Rates

Lack of preparation and ongoing support causes owners to return pets to shelters, increasing the stray animal problem.

Unethical Pet Markets

Most platforms profit from pet sales, enabling puppy mills and irresponsible breeding with zero welfare accountability.

OUR SOLUTION

Woofers Care AI

An ethical, AI-powered platform that combines Computer Vision + RAG to empower pet owners with breed-specific, personalized care guidance.

- ✓ AI Breed Scanner using MobileNetV2
- ✓ RAG-powered Personalized Care Plans
- ✓ Health Tracker & Vet Reminder Tools
- ✓ Adoption Support & Education Hub

We never facilitate, promote, or profit from the sale of live animals — adoption first, always.

HOW IT WORKS

Three simple steps to better pet care

01

Scan Your Dog

Upload a photo. Our MobileNetV2 AI analyzes breed characteristics with confidence scoring — instant results, no account needed for basic use.

02

Get Your Care Plan

Receive RAG-powered, breed-specific guidance: nutrition, exercise schedule, grooming frequency, health risks to watch, and lifespan expectations.

03

Track & Connect

Log vet visits, set reminders, download PDF care guides. Discover ethical supplies via Biopet.az, Wolt & Tap.az. Connect with local vets.

KEY FEATURES

Everything a responsible pet owner needs in one platform

AI Breed Scanner

MobileNetV2 neural network identifies dog breeds from photos with confidence scoring and instant care insights.

Personalized Care Plans

Breed-specific nutrition, exercise, grooming, and health plans tailored to your dog's unique needs.

Health Tracker

Track vet appointments, exercise goals, grooming schedules, and health notes with reminders.

Care Guide PDFs

Auto-generate printable care guides to share with vets, family, or new adopters.

Adoption Resources

Educational content promoting adoption, preparing new owners, and reducing shelter returns.

Ethical Supply Store

Smart recommendations via Biopet.az, Wolt & Tap.az. Zero commission on live animals — ever.

MARKET OPPORTUNITY

Azerbaijan's pet care market is growing — with no AI-native competitor

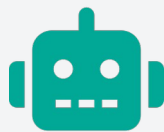

40%+

60%

Pet health issues prevented with proper breed info

Woofer targets the adoption-focused pet owner segment — a high-trust, underserved niche with strong repeat engagement and ethical brand loyalty.

BUSINESS MODEL

Sustainable revenue — zero dependence on live animal transactions

FREE

0 AZN

Basic breed analysis, care tips, adoption resources. Unlimited users.

Affiliate Partnerships

Biopet.az, Wolt AZ, Tap.az — commissions on pet supplies & accessories only.

BASIC

4.99 AZN/mo

Advanced health tracking, multiple pet profiles, priority support.

Veterinary Referrals

Referral fees for connecting owners with trusted local vet clinics.

PRO

9.99 AZN/mo

Vet integration, detailed analytics, custom care plans, API access.

Shelter Support

Free premium access for shelters — goodwill + brand trust + adoption data.

ROADMAP

From MVP to welfare network — a phased, responsible growth strategy

Q2 2025

Foundation

- ✓ AI breed engine
- ✓ RAG care system
- ✓ Biopet.az integration
- ✓ Beta with shelters

Q3 2025

Launch

- ✓ Public launch AZ
- ✓ Health tracking
- ✓ Vet reminders
- ✓ Shelter partnerships

Q4 2025

Welfare Network

- ✓ Vet booking
- ✓ Foster coordination
- ✓ Education library
- ✓ Premium tiers live

2026+

Expansion

- ✓ Regional growth
- ✓ Shelter management tools
- ✓ Telemedicine
- ✓ API for vets

TECHNOLOGY

Production-ready stack, built for scale

AI / ML

MobileNetV2 (TensorFlow/Keras) · RAG custom knowledge base · Confidence scoring

Frontend

Streamlit · Interactive UI · PDF Generation (FPDF) · Mobile-responsive

Backend

Python 3.9+ · JSON persistent storage · RESTful logic · Async-ready

Integrations

Biopet.az · Wolt Azerbaijan · Tap.az · Vet clinic API-ready · Shelter CRM bridge

Open-source friendly · No live animal data monetization · Vet-validated content · GDPR-conscious design

WHY SABAH.HUB?

What We're Looking For

Mentorship & Network

Access to mentors with experience in consumer apps, marketplace scaling, and Azerbaijan's startup ecosystem.

Go-to-Market Support

Guidance on user acquisition, local partnerships (vets, shelters, retailers) and growth strategy.

Product Development

Resources to evolve from MVP to a full mobile app with vet integrations and premium features.

Regional Expansion

Support for ethical expansion into neighboring markets with high stray animal populations.
